Product information

Tool for original Staubli CBR02 series

Art.Nr.: STA-CBR02-TOOL / manufacturer: STÄUBLI

203,00 EUR / pcs.

incl. 19% VAT plus 7,60 EUR DHL-Shipping

Delivery in approx. 2–3 weeks

Original Stäubli tool for quick-disconnect coupling (NIPPLE)Type: CBR.02, STAINLESS STEEL

Note: Please note delivery time !

Product information

This tool is required to screw the locki
Smaller design than type SPH.03, lock

Stäubli quick disconnect couplings are well known and need no further explanation.
Except perhaps to point out that the couplings can be sent to Stäubli for overhaul/maintenance at any time.

The coupling enables hydraulic lines to be disconnected quickly and cleanly without fluid leaking or air entering the system. They are suitable for brake fluids DOT3&4, such as Racing.

Due to the TITANIUM material, the temperature of the brake system does not affect the sealing "rubbers" as much as with aluminum clutches. The CBR series clutches are therefore often used in professional racing. Added to this is the smaller design, triple locking and lower weight than the SPH series. However, this also comes at a price!

Scope of delivery: 1 x coupling half (locking nipple) with EPDM seals CBR02.7410.TI.xx.JE
Material: Titanium, green or blue anodized
