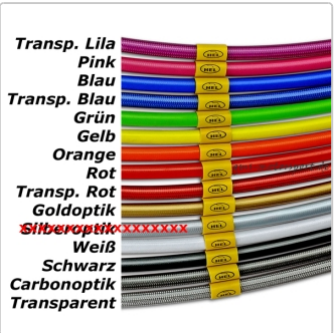
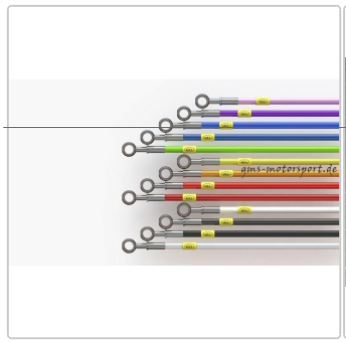
**393,90 EUR** / Set

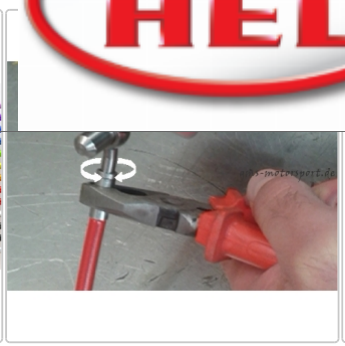
incl. 19% VAT plus 7,90 EUR DHL-Shipping

Ready for dispatch within 1–2 working days. Delivery time approx. 3–5 working days!



# Product information





**The fine line between victory and defeat**

On every kilometer of a race track it becomes clear how important a well-balanced brake is. Perfect control gives you the confidence you need because the difference between a good rider and an average rider is that one has speed under control, the other does not. That's why here at HEL Performance we make the best lines, so you have the control you need to perform at your best.

Every HEL Performance line is combined in-house with the best stainless steel fittings and then crimped.

With us you will find the right brake line kit for your vehicle and get what you expect, high-quality materials, excellent performance and visually outstanding brake lines.

HEL brake lines eliminate the spongy feeling you get from rubber lines.

We only use stainless steel components for all parts of our lines and do not use steel connections like other manufacturers, which rust over the course of their service life and again pose a safety risk.

Choose your desired color and click on Add to Cart to order your HEL brake lines.

**What's Stopping You?**

---

**Brake line kits from HEL Performance are supplied with ABE or parts certificate!**

Required **banjo bolts and copper gaskets** are automatically included in the line kit!
(Only applies to HBFxxxx, HBRxxxx, HBCxxxx line kits, not for individual lines made to measure)

HEL Performance offers you brake line kits in so-called **"alternative installation type" also with ABE !**

When ordering, please state the desired line color, the vehicle type and the type code of the vehicle. (Key number to.2.1 and 2.2 in the vehicle registration document)

---

**You have 14 cable colors to choose from, at no extra charge:**
transparent, carbon-look, black, white, red-transparent, red, orange, yellow, green, blue-transparent, blue, transparent-purple, pink

**We offer different installation variants for many models:**

**OEM, as original (standard kit):** The brake lines correspond in length, number and routing to an original spare part.

Alternative,**Full Length:** Two lines routed directly from the brake pump, one to the right and one to the left, to the brake callipers.

**Alternative, Over the Mudguard:** One line is routed directly from the brake pump to the right-hand brake calliper, the second from there via the mudguard to the left-hand brake calliper.

Steel flex lines for other models and designs can also be found on our homepage www.helperformance.de (please click on the link)

**HEL Performance stainless steel brake line**

# Product information

- eliminates the spongy feeling on the
- Direct and precise braking point
