HEL-Performance® Radial Hand Brake Master Cylinder, 19 mm Piston Diameter! HMC-MK-I - Black

Product information

The HEL Performance radial brake ma
Machined from solid material (housing

19 mm piston diameter / lever ratio (x 18, x 19, x 20 mm)

Both the housing and the lever are milled from solid stock at HEL Performance in Exeter (UK) using brand-new CNC machining centers. The housing is nickel-plated, and the lever is black anodized.

The newly developed brake levers come with two inserts that allow you to adjust the pump's gear ratio as needed.

Insert 1) has a center hole, while Insert 2) has an off-center hole.

Simply swap or rotate the insert to set the desired gear ratio for optimal control and brake feel.

The pumps are **designed for use** **onboth the right and left** sides **of** the handlebars **!!!** The bleed nipples and the brake line connection have the same thread (M10x1.00). This allows either the brake line or, optionally, the bleed nipple to be used on both holes.

Weight: Approx. 285 grams
Material : Housing / Lever = 6082-T6 aluminum, machined from solid
