with ABE, parts certification, or technical certification for special modifications

Sometimes you simply need more than just an ABE or a parts certificate. For special applications and modifications, we also offer a purely technical report. Regardless of the vehicle type or intended use! This gives you maximum flexibility for your project!

Note: No ABE is required for clutch lines!

Connections can be rotated at any time

No matter how far or how often!! Even back-and-forth movement is no problem thanks to HEL Performance's unique design. You've got it!!

#EasyMount

Precisely fitting hose kits!

Easy installation, since every brake line kit comes with all the necessary accessories—such as the required hollow screws*, O-rings, and clamps—already attached to the hose! No hidden extra costs **#EasyMount #YouGetWhatYouNeed**

Precise pedal feel, improved brake modulation

Thanks to improved modulation and a precise bite point, you'll gain a whole new level of control over the entire braking process!

#RideTheBestYouCan

All mounting parts are developed and manufactured by HEL in England!

#NoCompromise

Production of the lines in Germany (Made in Germany)

Every HEL Performance line is assembled in-house using the best stainless steel fittings and then permanently crimped on modern, digitally controlled machinery. Every line undergoes a final inspection before it is shipped. #SafetyFirst

Motorsport-proven technology

Our products are used in the highest classes of motorsports—whether it's MotoGP, Moto2, Moto3, or the EWC (the premier class in terms of material requirements)—you'll always get the same, top-notch HEL quality! #RideTheBestYouCan #RideHEL #TeamHEL

Stainless steel braided brake lines and kits from **HEL Performance** optimize your motorcycle's braking system. With improved modulation and a precise bite point, you'll gain a whole new level of control over the entire braking process! Whether you ride a MotoGP, Moto2, Moto3, WSBK, IDM, or EWC motorcycle—or even a simple 50cc scooter—every vehicle must have the best possible braking system in every situation. Stainless steel braided brake lines from HEL Performance are the key to achieving this.

The fine line between victory and defeat

Every kilometer of a racetrack highlights just how important a well-balanced braking system is. Perfect control gives you the confidence you need, because the difference between a good rider and an average one is that one has speed under control, while the other does not. That's why we at HEL Performance manufacture the best lines, giving you the control you need for peak performance.

With us, you'll find the right brake line kit for your vehicle and get exactly what you expect: high-quality materials, excellent performance, and visually striking brake lines.

We use only stainless steel components for all parts of our lines—unlike other manufacturers, who use steel fittings that rust over time and pose a safety risk.

Choose your desired color and click "Add to Cart" to order your HEL brake lines.

HEL Performance offers brake line kits with a so-called **"alternative routing method"**—even with **ABE certification!**

For many models, we offer various routing options:

OEM, like the original (Standard Kit): The brake lines correspond to an original replacement part in length, number, and routing.

Alternatively, Full Length: Two lines routed directly from the brake master cylinder—one to the right and one to the left—to the brake calipers.

Alternatively, Over the Mudguard: One line runs directly from the brake master cylinder to the right brake caliper; the second runs from there over the fender to the left brake caliper.

HEL Performance - Always No. 1 - What's Stopping You?
