Complete kit, or just front wheel, rear wheel; 2 lines at the front routed directly from the top in a continuous run (without ABS). Rear: 1 line routed directly!
Without hollow screws and copper gaskets!

Product information

WITHOUT ABE or parts certification! Not :

Installing this brake line kit voids the vehicle's general operating permit. The reason for this is that new vehicles registered on or after January 1, 2016, must be equipped with an anti-lock braking system (ABS). This brake line prevents the original ABS from being activated.

HEL Performance is the official equipment supplier and sponsor of the 2018 Yamaha R6 Cup, which will be held this year as part of the Alpe-Adria racing series!

When ordering, please specify **the desired line color**, **the vehicle type**, and **the vehicle's model code**. (Code numbers 2.1 and 2.2 on the vehicle registration certificate)

Connector colors: Stainless Steel Silver and Stainless Steel METAL-BLACK. Other connector colors may be available upon request!

#WhatsStoppingYou #RideTheBestYouCan #RideHEL

With ABE, parts certificate, or technical certificate for special modifications

Sometimes you simply need more than just an ABE or a parts certificate. For special applications and modifications, we also offer a purely technical certificate. Regardless of the vehicle type or intended use! This gives you maximum flexibility for your project!

Note: No ABE is required for clutch lines!

Connections can be rotated at any time

No matter how far or how often!! Even back-and-forth rotation is no problem thanks to HEL Performance's unique design. You've got it!!

#EasyMount

Precisely fitting hose kits!

Easy installation, since every brake line kit comes with all the necessary accessories—such as the required hollow screws*, O-rings, and clamps—already attached to the hose! No hidden extra costs **#EasyMount #YouGetWhatYouNeed**

Precise brake pedal feel, improved brake modulation

Thanks to improved modulation and a precise brake feel, you'll gain a whole new level of control over the entire braking process!

#RideTheBestYouCan

All mounting parts are developed and manufactured by HEL in England!

HEL Performance has an arsenal of machines on which we manufacture all fittings ourselves from the finest stainless steel. This allows us to fully control every step of the process, from the very beginning to the finished brake line. You get the best product straight from our factory.

#NoCompromise

Production of the lines in Germany (Made in Germany)

Every HEL Performance line is assembled in-house using the best stainless steel fittings and then permanently crimped on modern, digitally controlled machinery. Every line undergoes a final inspection before it is shipped. **#SafetyFirst**

Product information

Motorsport-proven technology

Our products are used in the highest classes of motorsports—whether it's MotoGP, Moto2, Moto3, or the EWC (the premier class in terms of material requirements). You always get the same, top-notch HEL quality! [#RideTheBestYouCan](#) [#RideHEL](#) [#TeamHEL](#)

Stainless steel braided brake lines and kits from **HEL Performance** optimize your motorcycle's braking system. With improved modulation and a precise bite point, you'll gain a whole new level of control over the entire braking process! Whether you ride a MotoGP, Moto2, Moto3, WSBK, IDM, or EWC motorcycle—or even a simple 50cc scooter—every vehicle needs the best possible braking system in every situation. Stainless steel braided brake lines from HEL Performance are the key to achieving this.

The fine line between victory and defeat

Every kilometer of a racetrack highlights just how important a well-balanced braking system is. Perfect control gives you the confidence you need, because the difference between a good rider and an average one is that one has speed under control, while the other does not. That's why we at HEL Performance manufacture the best lines, giving you the control you need for peak performance.

With us, you'll find the right brake line kit for your vehicle and get exactly what you expect: high-quality materials, excellent performance, and visually striking brake lines.

We use only stainless steel components for all parts of our lines—unlike other manufacturers, who use steel fittings that rust over time and pose a safety risk.

Choose your desired color and click “Add to Cart” to order your HEL brake lines.

HEL Performance offers brake line kits with so-called **“alternative routing” options—even with ABE certification!**

For many models, we offer various routing options:

OEM, like the original (Standard Kit): The brake lines match an original replacement part in length, number, and routing.

Alternatively, Full Length: Two lines routed directly from the brake master cylinder—one to the right and one to the left—to the brake calipers.

Alternatively, Over the Mudguard: One line runs directly from the brake master cylinder to the right brake caliper; the second runs from there over the fender to the left brake caliper.

HEL Performance - Always No. 1 - What's Stopping You?

Brake Line Kit Contents:

Stainless steel-braided brake line kit with stainless steel fittings Stainless steel hollow screws (only for ring fittings/banjos) Copper sealing rings Installation Instructions HEL sticker ABE or parts certification

The ABE is continuously updated. If your vehicle is not listed, or not yet listed, please contact us directly.

Note: The photos shown are examples and do not depict the brake line kit for the specified vehicle! When placing your order, you can specify your preferred hose color. The lines will then be custom-made “fresh” for you according to your preferences and specifications!

Technical Specifications:

Hose: Inner material PTFE Outer material 303/304 stainless steel & PVC protective sheath Material of Connections /
