with ABE, parts certificate, or technical certificate for special conversions

Sometimes it just has to be more than an ABE or a parts certificate. We also offer a purely technical certificate for special applications and conversions. Regardless of the vehicle type or intended use! This gives you maximum flexibility for your project!
Note: No ABE is required for clutch lines!

Connections can be twisted at any time

No matter how far and often! Even back and forth is no problem with the unique design of HEL Performance. Put your hand on it !!!!! #EasyMount

Precisely fitting line kits !

Easy installation, as each brake line kit comes with the necessary accessories such as the required banjo bolts*, sealing rings and brackets on the hose! No hidden additional costs #EasyMount #YouGetWhatYouNeed

Precise pressure point, better modulation of the brake system

Better modulation and a precise pressure point give you completely new control over the entire braking process! #RideTheBestYouCan

Development and production of all connecting parts at HEL in England!

HEL Performance has an arsenal of machines on which all connecting parts are manufactured in-house from the finest stainless steel. This enables us to fully control all processes from the first step to the finished brake line. You get the best product from our company.

Motorsport proven technology

Our products are used in the highest motorsport classes. Whether MotoGP, Moto-2, Moto-3, EWC (the premier class of material requirements). You always get the same and best HEL quality! #RideTheBestYouCan #RideHEL #TeamHEL

Stainless steel brake lines and kits from **HEL Performance** optimize the brake system of your motorcycle. Better modulation and a precise pressure point give you completely new control over the entire braking process! No matter whether you ride a MotoGP, Moto-2, Moto3, WSBK, IDM, EWC motorcycle or a simple 50cc scooter. Every vehicle must have the best possible braking system in every situation. Precious steel flex brake lines from HEL Performance are the key to this.

The fine line between victory and defeat

On every kilometer of a race track, it becomes clear how important a well-balanced brake system is. Perfect control gives you the confidence you need because the difference between a good driver and an average driver is that one has speed under control, the other does not. That's why here at HEL Performance we make the best lines and you have the control you need for top performance.

With us you will find the right brake line kit for your vehicle and get what you expect, high quality materials, excellent performance and visually outstanding brake lines.

We only use stainless steel components for all parts of our lines and do not use steel connections like other manufacturers, which rust over the course of their service life and again pose a safety risk.

Choose your desired color and click on Add to cart to order your HEL brake lines.

HEL Performance offers you brake line kits in the so-called **"alternative installation method", also with ABE!**

We offer different installation variants for many models:

OEM, as original (standard kit): The brake lines correspond in length, number and routing to an original spare part.

Alternative,**Full Length:** Two lines routed directly from the brake pump, one to the right and one to the left, to the brake callipers.

Alternative, Over the Mudguard: One line is routed directly from the brake pump to the right-hand brake calliper, the second from there via the mudguard to the left-hand brake calliper.

HEL Performance - Always No.1 - What's Stopping You?

Brake line kit scope of delivery:

Stainless steel-coated brake line kit with stainless steel connections Stainless steel banjo bolts (only for ring connections/banjo's) Copper sealing rings Assembly instructions HEL sticker ABE or parts certificate

The ABE is updated on an ongoing basis. If your vehicle is not or not yet included, please contact us directly.

Note: The photos shown are examples and do not show the brake line kit for the specified vehicle! You have the option of specifying your desired hose color when ordering. The lines are then manufactured "fresh" for you according to your wishes and specifications!
