Original Stäubli quick-disconnect coupling (NIPPLUG)Type: CBR.02, EPDM seals, STAINLESS STEEL, plug, M10x1.00 male thread

Note: Please note delivery time!

Product information

The locking nipple TYPE CBR.02 was c
Smaller design than type SPH.03, lock

Stäubli quick disconnect couplings are well known and need no further explanation.
Except perhaps to point out that the clutches can be sent to Stäubli for overhaul/maintenance at any time.

The coupling enables hydraulic lines to be disconnected quickly and cleanly without fluid leaking or air entering the system. They are suitable for brake fluids DOT3&4, such as Racing.

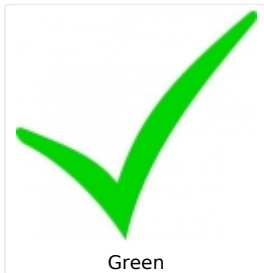

Due to the TITANIUM material, the temperature of the brake system does not affect the sealing "rubbers" as much as with aluminum clutches. The CBR series clutches are therefore often used in professional racing. Added to this is the smaller design, triple locking and lower weight than the SPH series. However, this also comes at a price!

Scope of delivery: 1 x coupling half (locking nipple) with EPDM seals CBR02.7410.TI.xx.JE

Material: Titanium, green or blue anodized
