HEL 4-Piston Radial Brake Caliper MK-II (1 Pair), 100 mm

Art.Nr.: HEL-BZ-V2-108 / manufacturer: [HEL Performance \(UK\)](#)

1.050,00 EUR / Pair

incl. 19% VAT plus 7,90 EUR DHL-Shipping

🚚 Ready for dispatch within 1-2 working days. Delivery time approx. 3-5 working days!

HEL-Performance® 4-Piston Radial Brake Caliper (1 Pair), Smooth Back **(INTRODUCTORY PRICE)**

HEL Performance brake calipers are available with a MotoGP-inspired nickel coating. Each caliper is equipped with two pad retaining pins. To replace the brake pads, simply unscrew these pins briefly and swap out the pads. The calipers should be blown out with air before reinstallation to

Product information

ensure that the internal surfaces are clean. Our brake calipers also feature a bleed screw, making it easier to completely remove air from the system.

Our brake calipers weigh 715 grams (without pads) and are equipped with stainless steel pistons. Stainless steel acts as a heat sink, dissipating the heat generated by braking. The brake fluid heats up less. The boiling point of brake fluids varies depending on the specific fluid used. Storing the heat in the pistons rather than heating the fluid improves braking performance over a longer period—perfect for the track.

We manufacture our brake calipers exclusively on state-of-the-art CNC machines from solid 6082-T6 billet aluminum. Many mass-produced brake calipers are forged, but this limits their design possibilities. The forged parts must also be machined for threads and the internal flow path, as the forging process is unable to produce these details. We offer the very highest product quality. The finish is breathtaking, with every part manufactured to CNC precision. We maximize weight savings and minimize material consumption. Radial mounting of two-piece brake pads with two pads per caliper.

- 4-piston (32 mm) stainless steel caliper design.
- The caliper is made of solid 6082-T6 aluminum.
- High-temperature seals.
- Radial mounts available in 100 mm, 108 mm, and **NOW also in 130 mm** for most modern motorcycles.
- The kit includes an instruction manual with all the information regarding installation, bleeding, maintenance, and more.
- with spacers

The calipers are designed to accommodate stock brake pads for well-known supersport motorcycles. This gives you a wide selection of brake pads from nearly all manufacturers and suppliers. We currently offer EBC FA390 brake pads as an option. In our extensive testing with renowned top riders on various race tracks in Spain and England, as well as in street use, these pads have delivered outstanding performance and results. The EP pad compound has ABE certification; the GPX pad compound is a pure racing compound without ABE certification. Comparable brake pad types for: SBS = 809, DP = DP950, Vesrah = VD-170, Ferodo = FDB2181, CL-Brakes = 1134 (Source: SBS.dk), TRW = MCB755 (Source: trwmoto.com)

Technical Information:

- Brake caliper with 100 mm bolt pattern = 30 mm offset
- Brake caliper with 108 mm bolt pattern = 22.5 mm offset
- Brake caliper with 130 mm bolt circle diameter = 22.5 mm offset

Package Contents:

- 2 x CNC-machined brake calipers (R+L), rear side with cooling fins
- 16 x spacer rings (4 each in 5, 7, 12, and 14 mm)
- 2 x stainless steel hollow screws with copper sealing rings
- Mounting screws not included; please order them separately if needed

Note: HEL Performance brake master cylinders and calipers are not compatible with Castrol SRF Racing brake fluid! Using this brake fluid may cause seal failure under certain conditions.

Stahlflex brake lines and kits from HEL Performance:

HEL-Performance® brake line kit, including hollow screws** and accessories**

- No expansion of the lines at high temperatures
- Eliminates the spongy feeling in the brake lever
- Direct and precise braking response
- Teflon inner liner with stainless steel jacket
- Exclusively stainless steel fittings
- Lower maintenance costs for the braking system
- Technology proven in motorsports
